These children require a complex and continuous therapeutic and rehabilitation regimen, which implies the need to incorporate new knowledge and practices that are uncommon in the daily existence of their mothers, as the care goes beyond what is offered to a healthy child. They're just not prepared yet to take care of .

The experiences of mothers numbers six and eleven also highlight the importance of Mother 6 and My son's in hospital, the entire church is praying. Hence, health professionals can better understand what it means to live with a chronic disease, how the disease becomes part of the daily life and how it influences their decisions.

It told the doctor she didn't have to medicate him, she ordered it and put him to sleep, the father wouldn't accept it and he was even worse than me, he even fought with the doctors. The popular system consists of non-professional cure specialists, strongly linked to the family .
