So how long was the query even slow? You can't capture an execution plan for encrypted stored procedures. Does it get slower? If you are trying to obtain the execution plan for statements in a stored procedure then you should execute the stored procedure, like so: This query was identified as a poorly performing query. To navigate the display of the execution plan, use the vertical and horizontal scroll bars. To contact a special car tuning service, an engineer looks at your car, looks at what exists, and asks you questions about exactly what you want.
