In most cases, alternative and well-known solutions are preferred and prolongate the transition to blockchain solutions. It is not guaranteed to be accurate or up-to-date, though we do refresh the database weekly. Lastly, the proposed rule would prohibit model aircraft from endangering the safety of the National Airspace System.

The goal of the project is to create a platform based on blockchain to facilitate

The Gartner Hype Cycle is a commonly used tool to classify the maturity, adoption and social application of specific technologies. In the short term, most use cases are related to the finance and energy industries, because there the costs of intermediaries are most obvious. After the production, it enables authentication of the part, helping technicians to ensure that it was not counterfeit before the installation into an aircraft.

In addition, IBM offers a consulting service to help customers realize their might be a business model in itself, because these intermediaries cause costs, increase complexity and provoke delays.
