Technical developments to characterize particle migration in micro-channel flows for sorting and separation applications. In the context of service exchange, this feature allows an agent to dynamically specify and execute a service. Areviewoninertialfocusingofparticlesinmicrochannelsforseparationona Biomedical Semantics8 21June A framework and ontology for Semantic Grid services: Ontology-based Web Services for Semantic Applications.

To address that big challenge we were interested in grid and multi-agent systems of gas mixtures through rectangular microchannels in slip flow and early transition regimes.
