Health Anatolian Shepherds are generally healthy, but like all breeds, they're prone to certain health conditions. The twisting cuts off blood supply to the stomach, and sometimes the spleen.

Watch for symptoms like restlessness and pacing, drooling, pale gums and lips. The good news is that there are many treatment options available for this condition. A low-vigor dog, on the other hand, has a more subdued approach to life. Without enough exercise, these breeds may put on weight and vent their pent-up energy in ways you don't like, such as barking, chewing, and digging.

Key Questions to Ask You Now Know the Things to Discuss with a Breeder, but then Dog or Cat. Do you have proper facilities to care for this dog?
